

global PROJECT BASED LEARNING (gPBL)

- Students from Japan and overseas partner universities working as tag teams will discuss and solve problems presented by professors, Japanese corporations and organizations.
- SIT encourages students to be engaged in acquiring problem solving capabilities, systems thinking, and systems management skills through this problem solving experience.
- Sharing cultures and exchanging ideas. A platform with diverse groups of students working on common problems.

Global gPBL at IIT Madras

- A 2-week program where students from SIT will engage in a combined **research topic** alongside with **IIT Madras students**.
- Students will learn and come in touch **several equipment, analysis and characterization techniques**.
- The outcomes are very appealing such as work that will suffice for **a conference or a publication in an international journal**.

Results:

- Published papers in international journals and conferences.
- Improved the image and visibility of SIT to other universities.
